

# Sparx Student Setup Guide

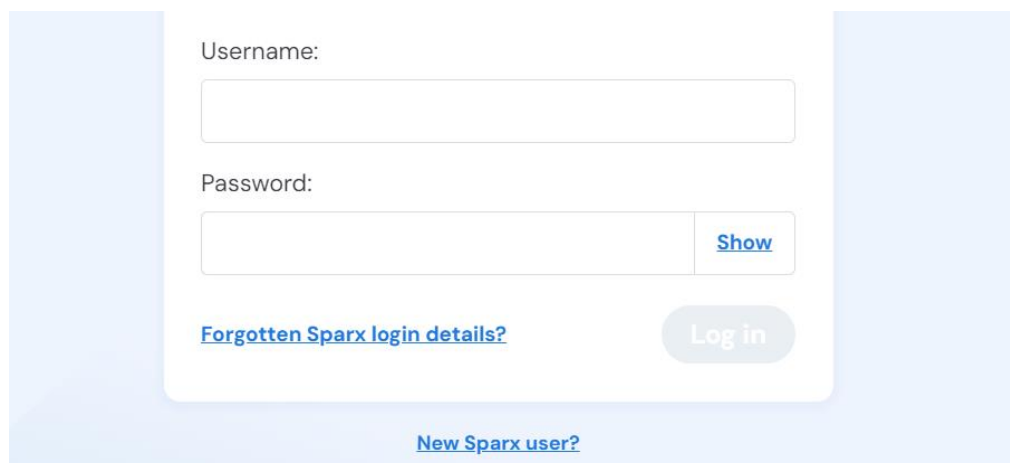

Step 1: Type into your search engine "Sparx Maths" and open the website

Step 2: Select Login then Student Login

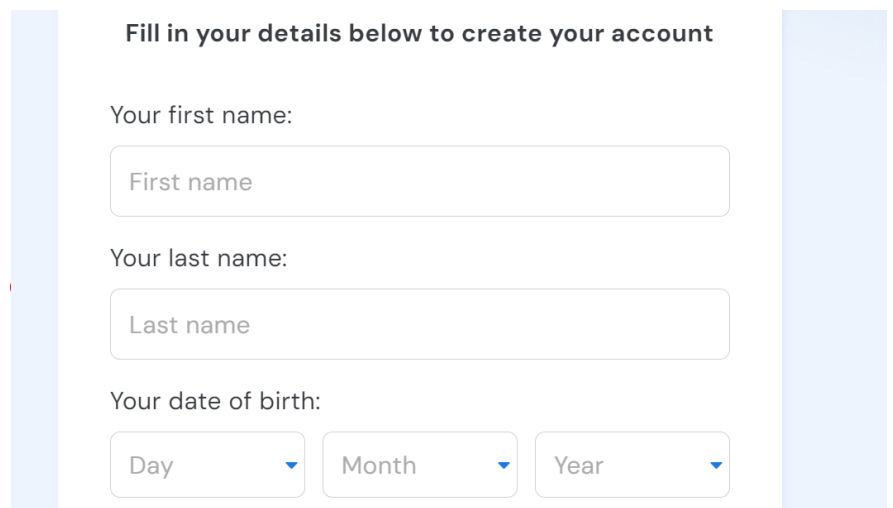

Step 3: Enter your school as St. Thomas More Catholic Academy (make sure you select the Stoke on Trent school under this name)

Step 4: Select "New Sparx User" at the bottom of the next page

Step 5: Enter your name (as it appears on SIMs/Class Charts) and your date of birth.

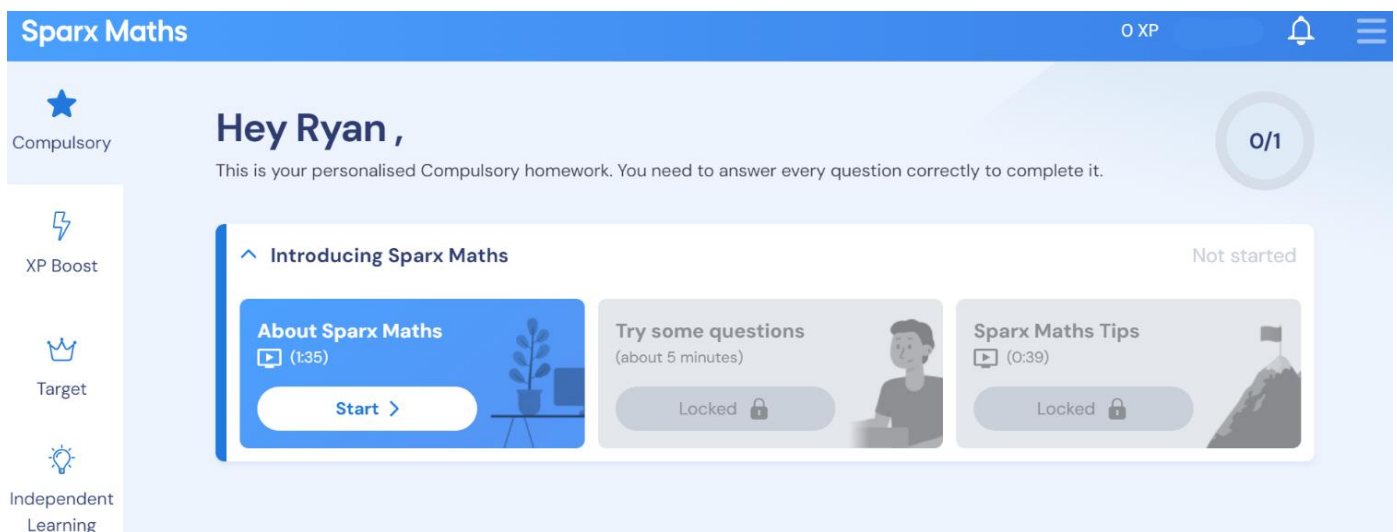

# Sparx Student Setup Guide

Step 6: Sparx will generate your username. This will be you first and last name combined. E.g. Mark Smith will be marksmith.

Step 7: You will then need to choose a password and write it somewhere in case you forget (in your planner or as a note on your phone)

## First Task:

Your first task will be an introduction task that should take no more than 10 minutes. After that your homework will follow the scheme of learning covered in lessons, providing you with the opportunity to consolidate your understanding.

As with Hegarty, you can use Sparx for more than just the work set as home learning. The top tab, "Compulsory", shows the tasks you need to complete each week. The other tabs will allow you to complete independent learning tasks to boost your XP.

Sparx XP will be monitored each term and the highest achievers will be invited to a rewards afternoon for that term.
